Hello, Please reconsider.
This is a very bad step. GNU is the source of some of the finest software
innovation. It makes technology available to the young and non-wealthy.
 The Founding Fathers are spinning in their graves, the US will be turning into
the USSR if we are not careful.

                                        Thank You--Joe M
